American Academy of Nurse Practitioners*

**DCH Orthopaedics is the  
exclusive provider of athletic  
training services for the following  
student athletes and sports  
teams:**

# Our Services

Our team of Orthopaedic specialists offer patients a comprehensive range of care, surgical repair, and digital imaging all in one convenient location.

Treatment for orthopaedic conditions may include medication, exercise, physical therapy or surgery. We strive to prescribe minimally invasive treatments whenever possible, and may recommend mere exercise or physical therapy in order to help you restore movement and function. Once your acute care is finished, our team will also instruct you on preventive care measures you can take to avoid future injury.

- Treatment of ankle sprains, fractures and instability.
- Treatment of rotator cuff impingement, labral tears, shoulder dislocation and shoulder arthritis.
- Treatment of hand fractures and dislocations, sprains, strains, and muscle or ligament tears, injuries to tendons, nerves, or vessels, and numbness or weakness in the hand or arm (including carpal tunnel syndrome).
- Treatment for arthritis, contractures, swelling or inflammation of the joints.
- Knee ligament and meniscus injuries
- Treatment of tennis elbow, neuritis, and tendonitis.
- Fractures and sports injuries.
- Reverse shoulder surgery.
- Hip Replacement surgery.
- Knee Replacement surgery.

**Focused on sports  
medicine, total joint  
replacement,  
fracture care, and  
arthroscopy of  
the knee and  
shoulder.**

## Suffering from knee, shoulder or other joint pain?

The DCH Orthopaedic team offers Platelet rich plasma (PRP) injections. This all natural option is used for a variety of common orthopaedic conditions.

PRP is a concentration of platelet cells taken from your blood. These platelets have growth factors that may help in the healing process of chronic injuries.

PRP injections can be done in the provider's office. The procedure takes about 30 minutes.

***Natural Injections to heal damage  
and reduce inflammation***

*"Exceptional care so close to home, easily allowed us to keep up with our busy family. Ease of appointment times with Dr. Thorne and Physical Therapy kept recovery smooth. It felt wonderful to have accessible quality care so close to home."*

*-Christina Hunt  
Orthopaedic Patient*

*"It's a real benefit for our community have someone like Dr. Thorne here. I've experienced firsthand the type of care he provides and now I recommend him and his team to all of my athletes and their parents."*

*-Coach Mark Holt  
Orthopaedic Patient*
